DIMENSIONS

NOTE 1 It is not possible to test every configuration of seat width, accessory combination, leg height, position and type or seat belt requirement. Therefore compliance can not be assumed where there is deviation from the standard supply or assembly method. Advantages of the product may be lost if insufficient consideration is given to the installation method. 2 Full compliance to seat belt anchorage regulations can only be achieved through in vehicle testing. 3 Product improvement may affect specifications. 4 Any dimensions given are for the purpose of guidance only.

Helping more people to travel in safety and comfort
